

# Creating Economic Dashboard

|                 |  |
|-----------------|--|
| Project Title   | Creating Economic Dashboard  |
| Project Summary | Using Haver Analytics and Microsoft Power BI to condense large amounts of economic data into an easily understandable dashboard form. Creating a tool for Economic officers to use to obtain up-to-date snapshots of their respective portfolios, organized by sector, geography, history, or other factors. |
| Country         | Egypt  |

## Project Description

This project will require working with Haver Analytics application to pull economic information from a myriad of sources into one place based on the needs of the Economic officers in Cairo. Working with Cairo's IT department and using Microsoft BI (Business Intelligence) to create a dashboard for easy-to-read and up-to-date economic data for use by our Economic team and others in Cairo. Another embassy in Africa has successfully put this project into effect and will be a model for us to follow.

## Required Skills or Interests
